

Package: showimage (via r-universe)

July 1, 2024

Title Show an Image on an 'R' Graphics Device

Version 1.0.0

Description Sometimes it is handy to be able to view an image file on an 'R' graphics device. This package just does that. Currently it supports 'PNG' files.

`show_image`*Show an Image on an R Graphics Device*

Description

Show an Image on an R Graphics Device

Usage

```
show_image(
  file,
  mar = c(0, 0, 0, 0),
  axes = FALSE,
  frame.plot = TRUE,
  asp = NULL,
  ...
)
```

Arguments

<code>file</code>	Name of the image file to show.
<code>mar</code>	Margin, the <code>mar</code> parameter, see <code>par</code> .
<code>axes</code>	Whether to show the axes. You need to increase the margin to see the axis labels.
<code>frame.plot</code>	Whether to draw a frame around the plot.
<code>asp</code>	Aspect ratio parameter for <code>plot</code> . If <code>NULL</code> , then the original aspect ratio of the image is used.
<code>...</code>	Additonal arguments are passed to <code>plot</code> .

Value

Nothing.

Examples

```
rlogo <- system.file("img", "Rlogo.png", package="png")
show_image(rlogo)

## Create a plot in a PNG and show it
png(tmp <- tempfile(fileext = ".png"))
pairs(iris)
dev.off()
show_image(tmp)
```
